Michael Karels
Computer Systems Research Group
Computer Science Division
University of California
Berkeley, CA 94720

Dear Mr. Karels:

Enclosed you will find the material known as "TAC" for inclusion in Berkeley Software Distributions if you find it useful. We own and have title to this material and we have the authority to convey it to you for inclusion in Berkeley Software Distributions. We understand that you may wish to modify this material before distribution, and have no objection to your so doing. Here is a list of the names of the files which make up this material: Makefile README tac.1 tac.c tmail.1 tmail.sh.

It is understood that the term "inclusion" referred to in the above paragraph means that The Regents have the right to distribute the material to whomever it deems appropriate, provided that legal obligations to AT&T are met prior to such distribution. We understand that the terms and conditions of the license under which the Berkeley Software Distribution are made available may be modified at any time by The Regents of the University of California.

It is further understood that licensees of Berkeley Software Distributions have the right to sublicense Berkeley Software Distributions, with or without modifications they may wish to make, provided that their legal obligations to AT&T are met.

We also understand that you will attempt to ensure that the enclosed material is distributed with the same provision regarding proper credit that is used for material originating at the University of California; however, the enclosed material is sent to you with no obligation that you, The Regents of the University of California, or any employees of The Regents actually ensure proper credit or provide any other specific protection for this material.

We do not intend by forwarding this material to you to enter into a contractual relationship; rather, we are providing this material for use in the Berkeley Software Distribution in order to make a contribution to the community of UNIX users.

Jay Lepreau
